

# automate & optimize

## Process Control System

tailored to the needs in the industries

### Your added value

- ✓ Easy start/stop operation
- ✓ Flexible enhancement
- ✓ Ready to connect MMS and high level control systems
- ✓ Optimized personnel structure
- ✓ Center of competence for comprehensive end-to-end customer support
- ✓ Worldwide technical service and support

## Central operation will optimize the personnel structure

Based on tested standard software and use of certified future orientated tools our Process Control System will guarantee the highest availability for machines and complete plants. An optimized concept ensures the automatic operation and fulfill the demands of the different industrial branches. Our tailor made applications in combination with a state of the art HMI simplify the operating process and allows optimization within the personnel structure. Powerful engineering tools will guide and support you for quick and save application programming.

### Used in:

- Cement Industry
- Lime Industry
- Chemical Industry
- Minerals Industry
- Naval Automation

# OP-AM Automation in BU Polysius, all over the world!
